

Getting your Business and People Cyber Aware

80%

of cyber-crime is preventable but it is up to organisations and individuals to make sure that they do not fall victim to it.

Every board or business owner needs to look at its cyber risk & mitigate it in 3 ways:

People:

- Have the right security expertise available
- The board or business owners need to understand the threat
- Middle tier leaders need to understand and lead this throughout the business.
- All staff need to be aware, educated and suspicious
- Maintain cyber awareness and induct new staff effectively
- Who has access to your systems and network?

Processes:

- Check that processes are in place to substantiate, such as invoice payment or account changes.
- Physical security matches the cyber security profile
- Complex password protocol
- Policies on revoking access
- Business continuity

Technical:

- Use top quality Antivirus software
- Carry out regular penetration testing
- Web monitoring
- Network monitoring
