

SME Business Continuity & IT Recovery Solutions

From just £12.95 per month

“Affordable Continuity Solutions for Small Businesses in the UK”

What is Business Continuity?

We think ‘survival’ should be the primary objective for any business.

Ever wondered how you would recover your own business operations if you were unfortunate enough to experience an unwanted incident, like a fire, flood, denial of access, or major IT or telecoms failure?

Put simply, “Business Continuity is about understanding the most critical areas of your business operations and ensuring you can protect or recover them in a timely manner, with minimal impact on your organisation following an incident.

Who are Easy Continuity?

EasyContinuity is able to bring you inexpensive solutions and services – which only cost money when you need them. Even then, your business interruption insurance should cover it.

Our UK wide network of business continuity & office providers, IT recovery specialists and continuity experts make us the perfect choice for protecting your small business at an incredibly low cost.

Why not take a look at our website or get in touch.

What are the benefits?

- Maintain the survival of your business
- Protect your revenue, cash flow, customer base, brand & reputation
- Create confidence amongst your supply chain & customers
- Minimise business impact by getting your critical functions and activities up and running as soon as possible.
- There's no need to sign a formal contract, simply sign up and pay monthly using our secure PayPal checkout.
- Support from continuity experts with over 15 years experience in the industry, independently accredited to the Business Continuity Institute

Prices & Packages

Our packages are simple, very affordable and payable monthly.

Starting at only £12.95 for 10 employees, with scaled options for up to 50 staff.

Not sure which package you need, or need something more bespoke? Then just fill in our form on the website.

In terms of setting expectation, its important to remember that this service is designed to be used 'post incident' and to start getting a business back on its feet within 24-48hrs. It should not be regarded as a cheaper replacement for organisations that require a fully tested, more costly and faster recovery service.

If you do need a quicker recovery time, or the ability to test end to end, then get in touch and we will still be happy to help.

Service Feature	Standard
Number of Staff Covered	From 10 - 50

Service Features

Our service contains the features you need as standard in order to recover your business.

Our standard service offers outstanding value for money, with the additions of a 'cloud' hosted business continuity plan, or free web based software, as well as help from fire and flood specialists, should the worst happen!

Benefits to Partners...

- Brokers should be able to offer clients a better choice of insurer as a result of having some continuity provision in place.
- Recurring commission revenue stream. Typically 25% of a subscription.
- Stronger product portfolios with the ability to differentiate – e.g as a feature of a property or professional indemnity policy
- Reduced levels of business interruption pay out
- Co branded marketing collateral, such as PDF datasheets
- A UK wide business continuity network with 95% coverage across mainland UK
- Strength in partnership - with leaders in business continuity
